

Maths Home Learning Task

This week, I would like you to think about using subtraction to find the change. In a pretend shop, you could buy items and pay using a coin with a greater value than the total. For example, buy an apple for 5p and pay with a 10p coin. Work out '10p - 5p =' by using real objects, counting back on a number line, counting back in 1s using your fingers or mentally. Have a go at finding the change below.

- 2p = _____

- 4p = _____

- 7p = _____

- 5p = _____

- 9p = _____

Play the online Toy Shop game to apply your learning:
