

Dear children (and parents),

I hope you are all safe and well; as you may know due to the global pandemic known as covid-19 (corona-virus) most people have not been able to go to school, but some have. Even though school is a little different there is absolutely no reason to be scared.

I am one of the lucky students who has been able to come to school; this is how I know what school is like. In the classrooms we currently have our own desk, draw and set of supplies. This will however be different when you come back. We also have to bring our own bottle of water (with fruit if you would like to) to school which you will still have to do.

Your class will be your bubble and they are the people have to stay with. You are not allowed to go within 2 meters of other bubbles; unfortunately this means you cannot play with people from other classes at dinner or play times.

We have to wash our hands a lot more often now. Before and after break and dinner we will one at a time wash our hands which won't take long as we have multiple sinks. When having dinner each class will go in all together and will wait until everyone has finished go back out. Because there are only 3 areas to play on the in the school grounds 3 classes will go out at a time. Each class will also have their own set of toys and equipment.

Though it may seem a little scary, there is absolutely no reason to worry. Stay safe we hope to see you soon. 😊

Yours sincerely Arwen.W : Y6
